

**THE BRITISH COLONIST.**

Wednesday Morning, Feb. 10, 1869.

**TO ADVERTISERS.**

Transient Advertisements must be paid for in advance to insure insertion.

**TO AGENTS.**

Settlements of accounts will be required monthly, or bimonthly or papers will be discontinued. The daily and weekly issues will be furnished at the lowest cash rate, and no exception will in future be made to this rule.

The unfortunate and anomalous condition of the Supreme Courts of this Colony has frequently formed the subject of discussion and remark, and given rise on more than one occasion to scandalous vexation, and annoyance, all which might have been avoided had care been taken in framing the Union Act to provide for the retirement of one of the gentlemen who act in a judicial capacity in the two sections of the Colony and the union of their respective courts. At the last session an ordinance was sent down by the Government and passed; but when it went home Her Majesty's consent was withheld because it failed to provide for either of the Judges in case of retirement. Before the present Council had been called together it was understood that an effort would be made on the part of the members of the legal fraternity who hold seats in that body to remedy the evil. About one month ago, hon. Mr. Drake, junior member for the city, introduced an emphatic resolution which expresses so tersely and clearly the public feeling and want that we cannot do better than to produce it it.

"That this Council is of opinion that the existing condition of the Supreme Courts of this Colony is highly anomalous, mischievous, and inconvenient; and pending an Organic Ordinance for the establishment of one Supreme Court, an Ordinance should be passed forthwith to establish, (1) A concurrent jurisdiction in each of the Supreme Courts throughout the entire Colony; (2) An appeal as of right from the decision of either of the existing Supreme Courts, to the Judges of both Courts, with the addition of a third Judge of Appeal."

The resolution was debated twice in secret session and action deferred for a few days. In the meantime the hon. Attorney General brought forward a measure which he stated was to prove a panacea—a cureall for the judicial ills under which the Colony labors. The bill was essentially a Government measure. It settled nothing; decided nothing. There was to be no concurrent jurisdiction. The Courts would remain as now constituted until the death, resignation, removal or translation of one of the judges, when the other was to be created Chief Justice, and then the Courts would be united as the Supreme Court of British Columbia, and a Puisne Judge appointed at a salary of £1000 per annum. Yesterday the bill was pressed upon the attention of the Council. As it appeared in the orders of the day, it preceded Mr. Drake's resolution, which, having been introduced first, was entitled to precedence. This fact was pointed out by Mr. Ring, and upon a vote being had the order was reversed, the resolution taken first, and an amendment calling for a special committee to prepare a bill upon the basis of the resolution passed without debate. The bill was next considered. The Government members spoke and voted in its favor, while the representative members, strengthened by the voices and votes of Hons. Mr. Wood and Mr. Walkem from the ranks of the appointed members, voted to throw it out, which after a sharp struggle was accomplished by a majority of one. In the hands of a special committee of practical men, the Supreme Court muddle is capable of a solution satisfactory to both occupants of the Bench. In the hands of the Government for two years and upwards, it has been "meddle and muddle" from first to last. Not the slightest good result has been attained by any of the multifarious projects emanating from the Executive Council for the settlement of this vexed question. As we have shown, the Government measure of last session was cast aside by the Home Government for a reason that our Government ought to have been aware existed before it took the matter up; and now that the whole subject has been thrown into the hands of practical members we trust that no obstacle will be interposed to prevent an equitable and honorable solution of the difficulty, for which we regret we cannot employ a milder term than that of disgraceful.

PARIS, Feb. 6—Early payment of one instalment of the Mexican loan is promised.

PARIS, Feb. 7—Queen Isabella has issued another manifesto denouncing the report that she repudiated Spain and asserting her right to the throne.

The Great Powers have granted a delay of eight days for the Greek Government to make their final decision in regard to the proposals of the Paris Conference.

The announcement is made on official authority that late advices from Athens give the French Government hope that the peace policy of King George will triumph. Great agitation still prevails at Athens.

It is noted as a remarkable coincidence that the Suez Canal and the Pacific and Atlantic Railways will be completed and open for through service in the same year and at nearly the same date of the month.

MADELINE HENRIQUES, the actress, who recently married Jennings, the New York correspondent of the London Times, is coming back and will take to staging again. Incompatibility is the trouble.

The Montpensier faction in Spain imputed the recent uprising at Cadiz to the influence of agents of the United States.

SPECIAL TO THE DAILY BRITISH COLONIST

**LAST NIGHT'S DESPATCHES.****Oregon.**

PORTLAND, Feb 6—The steamer Active arrived this morning.

**California.**

SAN FRANCISCO, Feb 6—There have been eighty deaths this week, including twenty-five from the small-pox epidemic; this is an increase, owing principally to the relaxation of precautions.

A match trial of velocipedes at the Pavilion, this afternoon, was witnessed by a large number of spectators. The fastest time made was one mile in three minutes.

The leading retail dry goods merchants have published a card agreeing to close their stores at 7 o'clock p.m.

**Eastern States.**

WASHINGTON, Feb 6—The Senate took up the Tenure of Office Repeal Bill. Edmunds said the Judiciary Committee had amended the Bill so as to permit the President to suspend Civil officers whenever required, subject to the approval of the Senate. Heads of departments should be subject to removal at the will of the President alone. The Committee had reported to that effect. Morton favored the repeal of the law; he thought the public service had never been benefited by it. No action was taken.

Corbett's amendment to the Constitutional Amendment excludes Chinamen and Indians. He takes the ground that it is nowise admitting to citizenship a race of pagans, who, if allowed to vote, would come from China in vast numbers and take possession of the whole Pacific Coast.

Howard, from the Committee on the Pacific Railroad, reported a bill to aid the Northern and Southern Pacific, Atlantic Pacific, and Oregon branch by guaranteeing interest of bonds. Ordered printed.

Morgan made a minority report against it.

The January statement shows the total public debt, less cash, in the treasury to be \$2,556,205,658.

NEW YORK, Feb 6—The Bremen bark America arrived with nine passengers from the Hibernia. She took from the British bark Cutforth the crew of the Hibernia, some of which were landed at the Azores. All hopes of the safety of the missing boat are crushed.

**Europe.**

LONDON, Feb 6—In Greece the Ministry fails to secure a Premier, but give assurance that they are firmly for the protocol. The prelates recently elected to the Cortes have been forbidden to take their seats.

MADRID, Feb 7—It is said Prince Ferdinand has consented to be a candidate for the throne of Spain.

An order has been issued for the execution of the assassins of the Governor of Burgos.

It is generally conceded that Alozaga will be chosen President of the Constitutional Cortez. Many rumors prevail about the proposed directory. Some assert that the members are to be elected for five years. Many political arrests have been made lately, all on the charge of being engaged in the Carlist movement. The name of Prince Gligenti is stricken from the roll of the Spanish army. The Carlists are very active, and the indications are that they are laboring to produce an insurrection which may break out at any moment. It is rumored that the 11th Inst. has been fixed upon by them for an open demonstration against the provisional government.

PARIS, Feb. 6—Early payment of one instalment of the Mexican loan is promised.

PARIS, Feb. 7—Queen Isabella has issued another manifesto denouncing the report that she repudiated Spain and asserting her right to the throne.

The Great Powers have granted a delay of eight days for the Greek Government to make their final decision in regard to the proposals of the Paris Conference.

The announcement is made on official authority that late advices from Athens give the French Government hope that the peace policy of King George will triumph. Great agitation still prevails at Athens.

It is noted as a remarkable coincidence that the Suez Canal and the Pacific and Atlantic Railways will be completed and open for through service in the same year and at nearly the same date of the month.

MADELINE HENRIQUES, the actress, who recently married Jennings, the New York correspondent of the London Times, is coming back and will take to staging again. Incompatibility is the trouble.

The Montpensier faction in Spain imputed the recent uprising at Cadiz to the influence of agents of the United States.

HONOLULU, S. I. fes 1m

DR. G. M. PHILLIPS,

Dentist,

WOULD RESPECTFULLY

inform the inhabitants of Victoria that he is SHAKESPEARE

**THEATRE ROYAL.**—Last night Mrs. Bates took her benefit, selecting the beautiful and highly sensational play of 'The Lady of Lyons' for the occasion. Of a character in which the ablest and most brilliant actresses have striven to distinguish themselves it is unnecessary to speak; but it appeared to us that on these boards, Mrs. Bates never appeared to greater advantage. In all that is weak, true and lovely in woman, for which passions the character is so suited to display, she was in all scenes, in all gestures, intonations and attitudes, strictly in unison with nature, earning throughout most amply the repeated acknowledgments of the audience. Mr. Bates' Claude Melnotte was also a chaste and fine piece of acting. His Excellency the Governor and many of our leading families were present, the beneficiary being greeted by a full house. At the close of the performance Mr. and Mrs. Bates were again called before the curtain and made the recipients of one of those earnest compliments our people are so ready to bestow upon talents and merit.

**LEECH RIVER.**—Mr. Harnett and Captain Wyld returned from the river last night, having walked the whole distance each way in a day. They walked from Victoria to the river in six hours and a half, and from the river to Victoria in eight. On Monday night, three inches of snow fell on the river, and from six to eight inches from Wolf Creek to the Goldstream mountain; on this side the mountain there was but a sprinkling of snow, and at Mr. Ash's house none. Capt. Wyld, we understand, was for many years in the same fine gold district in California as Mr. Harnett, in working which he had much experience. He thoroughly endorses Mr. Harnett's opinion that the ground will all pay well if properly worked, and a second company has been formed and has located six hundred feet for hydraulicing. This ground is considered somewhat more promising, and less expensive to prepare than that taken up by Harnett and company. If the snow does not interfere, washing will commence in three weeks.

**COST OF THE INDIAN WARS.**—A compilation from official records regarding the Indian wars show the cost to the United States Government of the various Indian wars of the past forty years to have been as follows: The Black Hawk war, 400 lives and \$5,000,000. The Seminole war cost \$160,000,000 and 7,500 lives, only 1,500 of the Indians being warriors. A war with the Creeks and Cherokees, about the same time, cost \$100,000. The Sioux war of 1862 cost 300 lives and about \$40,000,000. The Cheyenne war in 1867, 300 lives and about \$12,000,000. The Indian wars on the Pacific slope for the last twenty years, about \$30,000,000. Three campaigns against the Navajoes cost \$30,000,000. The whole of the troubles in New Mexico, of which the last item forms a part, \$150,000,000.

**DRESS-CIRCLE.**—Editor BRITISH COLONIST:—Are you not afraid to meet the inquisitive glances of indignant mammas whose children you have made a raid upon through your paper? No! Then, sir, you ought to be; for I warn you that the *infanty* of Victoria have sprung 'to arms' and threaten to rain sucking-bottles and high chairs upon your head if you don't cease your attacks upon them.

Young Vancouverites ought to be encouraged, sir, in their search after historic information and intellectual amusement, instead of being bullied and abused by a set of people who, I don't believe, ever had a child of their own, and can't tell a bib from a diaper, or a sugar-tart from a bowl of pap.

Let the babies enjoy themselves; let them scream, squall, cry or cry. So long as they like it, I don't think the old bachelors who

crowd the dress-circle every night instead of having wives and babies of their own to take care of, have any reason to object. As for *fallers*—if they go to the theatre without their wives they deserve to be annoyed—haunted by babies; and were their wives with them, they would not dare to object to the innocent little dears when they make a little noise by way of showing their approbation of the play.

Don't the men applaud, I'd like to know? and is not a baby right in claiming the same privilege? Babies forever, I say! and I wish there were more of them in Victoria, and fewer bachelors to poison the air with tobacco smoke and addle their brains with.

I am, yours most truly, but not sympathizingly,

**THEatre ROYAL.**—We understand that in consequence of the dangerous condition of the planking in Waddington Alley, the Municipal Council intend having the said alley-way closed forthwith, unless the same is immediately put into proper repair. This step is rendered necessary for the protection of the public safety.

**THE Metchosin and Goldstream range** of mountains were covered with a mantle of pure white yesterday morning, and a keen NE wind, laden with frost, prevailed during the day, with indications of a heavy blow or rain.

**DENTISTRY.**—Persons having decayed or sensitive teeth would do well to call on Dr. Grady, Dentist, at the Colonial Hotel—office, Room No. 1. The doctor comes highly recommended, and is a first-class operator. \*

**JAMES BAY BRIDGE.**—This bridge is now open for the passage of vehicles. The first wagon crossed on Monday. It is said the contract will be completed on Friday.

**THE ALBERNI MILLS.**—The Alberni Mills were sold at Tuckett last Tuesday for four thousand five hundred dollars.

**THE BARK CECROPS.**—Bound for Victoria, was spoken in latitude 9:30 S. latitude, on the 16th November, by a ship bound for San Francisco.

**THE STEAMER ELIZA ANDERSON.**—Left Olympia yesterday for Victoria.

#### The Baby Nuisance.

**EDITOR BRITISH COLONIST:**—I think you are entitled to thanks for the bold manner in which you have attacked infants that almost nightly disturb the audience, and spoil the effect of the superb acting of the Bates troupe.

Babies are nice enough in their place; which is not in the dress-circle of a theatre, ba-ba-ing and coo-coo-ing in the ears of people who have paid their dollar for the privilege of listening to what is going on upon the stage, and who are forced either to submit quietly to the infliction or retire from seats they have perhaps secured and paid for to another part of the house. You ought to keep hammering away at what you term the 'Baby Nuisance' until every mother's son or daughter of 'em is left at home, or gagged before being brought to the theatre.

**DRESS-CIRCLE.**—Two interesting facts, now first brought to light, deserve to be stated. It is found that these prominences, or sierras, to which the name of corona has been applied by astronomers, overlap a little upon the edge of the sun's disc. This is a phenomenon which could never be observed in a total eclipse, of course. The hitherto accepted theory that the orange line in the spectrum of the prominence examined by Lieut. Herschel was due to the presence of sodium in the solar flames, is exploded, and it is almost certainly established that the flames are hydrogen flames by the very peculiar and extremely nice revelations of the spectroscope. A single ray of solar light, so much more brilliant than the light of the corona, renders it totally invisible. It must be set down as one of the great triumphs of modern science that it can determine certainly the character, map out and observe changes in the form of a distant light which no instrument can render invisible.

**SMALL VS. LAROK FARMS.**—Robert Bakerwell, the celebrated English farmer, used to tell the following anecdote of a farmer in Leicestershire:

"This farmer, who owned and occupied one thousand acres of land, had three daughters. When his eldest daughter married, he gave her one quarter of his land for her portion, but no money; and he found, by a little more speed and a little better management, the product of his farm did not decrease. He then set to work, and began to grab up his furze and fern, and plough up what he called his poor, dry furze, covering, in some places, nearly half the land. After giving half his land away to two of his daughters, to his great surprise he found that the product increased; he made more money, because his new broken-up furze land brought excessive crops, and at the same time he farmed the whole of his land better, for he employed more laborers on it; he rose two hours sooner in the morning, had no more dead fallsows once in three years; instead of which he got two green crops in one year and ate them upon the land. When the third and last daughter married, he gave her 250 acres, or half what remained, for her portion, and no money. He then found that he had the same money to farm one quarter of the land that he had at first to farm the whole."

**THE COMMISSIONER** sent by the British Government to examine the counties lying on the northwestern frontier of its Asiatic possessions reports that the region between Afghanistan and Tibet is rich and fertile enough to support a large army with ease.

As the Russian army must pass through this hitherto unknown region, in order to invade India, the statement has created great excitement. The Commissioner has also discovered that the Hindu Khyber may be easily crossed in the northeast by an army with camels and horses, and that a railroad might be run across them. The reports of precipices 17,000 feet high are declared

## Medical.

# AYER'S Sarsaparilla

FOR PURIFYING THE BLOOD,  
And for the speedy cure of the following complaints:  
Scrofula and Scrofulous Affections, such  
as Tumors, Ulcers, Skin Eruptions,  
Pimples, Boils, Blisters, Boils,  
Blains, and all Skin Diseases.

OAKLAND, Ind., 6th June, 1859.

J. C. AYER & Co. Gents: It is my duty to acknowledge what your Sarsaparilla has done for me.

Having inherited a Scrofulous infection, I have suffered from it in my childhood. Some

time it burst out in Ulcers on my hands and arms; sometimes it turned inward and distressed me at the stomach.

Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and loathsome beyond description.

I tried many medicines and several physicians, but without much relief from any of them. In fact, the disease was at length a very bad relapse, to which I had in the Gospel Messenger, that you had prepared an alternative (Sarsaparilla), for I knew from your reputation that anything you made must be good.

I sent to Cincinnati and got it, and used it till it cured me. I took it, as you advised, in small doses of a teaspoonful over a pint of water, and it was a great relief.

Now my healthy skin soon began to pass under the scab, which after a while fell off.

My skin is now clear, and I know by my feelings that the disease has gone from my system.

You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the apostles of the age, and remain ever gratefully yours,

ALFRED B. TALLEY.

St. Anthony's Fire, Rose or Erysipelas, Tetter and Sore, Rheumatic Head, Ringworm, Sore Eyes, Dropsey.

Dr. Robert M. Preble writes from Salem, N. Y., 12th Sept., 1859, that he has cured an inveterate case of Dropsey, which threatened to terminate fatally, by the persevering use of our Sarsaparilla, and also a dangerous Malignant Erysipelas by largely exceeding the dose of our common Dropsey.

Dr. J. C. AYER: Sir, I am told that you have a

Brachiocephalic, Goitre or Swelled Neck.

Zebulon Sloan, of Prospect, Texas, writes: "Three bottles of your Sarsaparilla cured me from a Goitre—a hideous swelling on the neck, which I had suffered from over two years."

Leucorrhœa or Whites, Ovarian Tumor, Uterine Ulceration, Female Diseases.

Dr. J. B. S. Channing, of New York City, writes: "I most cheerfully comply with the request of your agent in saying that your Sarsaparilla is a most valuable alterative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scrofulous diathesis. I have cured many inveterate cases of Leucorrhœa by it, and some where the complaint was caused by ulceration of the uterus. The ulceration itself was soon cured. Nothing within my knowledge equals it for these female derangements."

Edward S. May, of Newbury, Mass., writes: "A dangerous ovarian tumor on one of the females in my family, which had defied all the remedies we could employ, has at length been completely cured by your Extract of Sarsaparilla. Our physician thought nothing but extirpation could afford relief, but he advised the trial of your Sarsaparilla as the last resort before cutting, and it proved effectual. After taking you remedy, only eight weeks no symptom of the disease remained."

Syphilis and Mercurial Disease.

NEW ORLEANS, 23rd August, 1859.

Dr. J. C. AYER: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsaparilla.

I have cured it, in my practice, most of the complaints for which it is recommended, and have found it to be truly beneficial in the cure of Venereal and Mercurial Disease. One of my patients had Syphilitic ulcers in his throat, which were consuming his palate and the top of his mouth. Your Sarsaparilla steadily taken cured him in five weeks. Another was attacked by secondary syphilis in his rectum, and it proved effectual.

After taking you remedy, only eight weeks no symptom of the disease remained.

Fraternally yours, G. Y. LARIMER, M. D.

Rheumatism, Gout, Liver Complaint.

INDEPENDENCE, Preston Co., Va., 6th July, 1859.

Dr. J. C. AYER: Sir, I have been afflicted with a painful chronic Rheumatism for a long time, which baffled the skill of physicians, and stuck to me in spite of every remedy. I was told to take your Sarsaparilla. One bottle cured me in two weeks, and restored my general health so much that I am far better than before I was attacked. I think it a wonderful medicine.

J. FREEMAN.

YANKEE, of St. Louis, writes: "I have been afflicted for years with an affection of the Liver, which destroyed my health. I tried every thing, and everything failed to relieve me; and I have now a broken heart, and for the last two years have been a burden to my friends, from the derangement of the Liver. My beloved pastor, the Rev. Mr. Eddy, advised me to try your Sarsaparilla, because he said knew you, and anything you made was worth trying. By the blessing of God it has cured me, and has so purified my blood as to make a new man of me. I feel young again. The last that can be said of you is not half good enough."

Schistos, Cancer Tumors, Enlargement, Ulceration, Curies and Exfoliation of the Bones.

A great variety of cases have been reported to us where cures of these formidable complaints have resulted from the use of this remedy, but our space here will not admit them. Some of them may be found in our American Almanac, which the agents below named are pleased to furnish gratis to all who call for them.

Dyspepsia, Heart Disease, Fits, Epilepsy, Melancholy, Neuralgia.

Many remarkable cures of these afflictions have been made by the alterative power of this medicine. It stimulates the vital functions into vigorous action, and thus overcomes disorders which would be supposed beyond its reach. Such a remedy has long been required by the necessities of the people, and we are confident that this will do for them all that medicine can do.

AYER'S Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness,

Group, Bronchitis, Incipient Con-

sumption, and for the Relief

of Consumptive Patients

in all their stages

of the Disease.

This is a remedy so universally known to surpass any other for the cure of throat and lung complaints, that it is useless here to publish the evidence of its virtues. Its unrivaled excellence for coughs and colds, and its truly wonderful cures of pulmonary consumption, are known throughout the civilized nations of the earth. Few are the communities, or even families, among them who have not some personal experience of its effects—some living trophy of their midst of its victory over the subtle and dangerous disorders of the throat and lungs. As all know the dreadful fatality of these disorders, and the misery they inflict on the patients, we need not say more than to assure them that it now, all the virtues that it did have when making the cures which have won so strongly upon the confidence of mankind.

Prepared by Dr. J. C. AYER & Co., Lowell, Mass.

Coughs, Colds, Rheumatism, Diarrhoea,

Dysentery, and Fever.

THE "TIMES" OF INDIA, STATES

that the discovery of Dr. COLLIS BROWNE'S CHLORODYNE is of great service to the human race.

the discovery of Venereal Disease. This remedy is invaluable in the above disease, and is indispensable to Migrants, Travellers, and Families, a few doses being generally sufficient.

DR. J. COLLIS BROWNE'S CHLORODYNE.—The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Daventry, that he had received information to the effect that the only remedy of any service in India was Chlorodyne.—See "Lancet," December 21, 1858.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Extract from "Medical Times," January 12, 1856.—"Is prescribed by scores of orthodox medical practitioners." Of course it would not then singularly popular did it not supply a want and fill a place.

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in Gout, Colds, Asthma, Consumption, Neuralgia, Rheumatism, etc.

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay. "Chlorodyne is a most valuable remedy in Neuralgia, Asthma and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other medicines had failed."

It is necessary to warn the public against species of Chlorodyne, which are only bark, water, and resin, and devoid of the true properties of the genuine, viz., Dr. J. COLLIS BROWNE'S, as was proved before Vice-Chancellor Sir W. P. Wood, in the Court of Chancery, in case Browne vs. Freeman, when the Vice-Chancellor stated that the story of Freeman being the Inventor was entirely untrue.

Sold in Bottles, 1s 1d., 2s. 9d., 4s. 6d., and 11s., by the sole Manufacturer, J. T. DAVENPORT, 33, Great Russell Street, London.

TEN FIRST PRIZES, ONE SECOND PRIZE  
AND A SILVER MEDAL.

Carrying off almost every prize for which they competed and thus after trials the most severe and prolonged ever known.

On J. & F. Howard.

Dr. J. C. AYER & Co. Gents: It is my duty to acknowledge what your Sarsaparilla has done for me.

Having inherited a Scrofulous infection, I have suffered from it in my childhood. Some

time it turned inward and distressed me at the stomach.

Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and loathsome beyond description.

I tried many medicines and several physicians, but without much relief from any of them. In fact, the disease was at length a very bad relapse, to which I had in the Gospel Messenger, that you had prepared an alternative (Sarsaparilla), for I knew from your reputation that anything you made must be good.

I sent to Cincinnati and got it, and used it till it cured me. I took it, as you advised, in small doses of a teaspoonful over a pint of water, and it was a great relief.

Now my healthy skin soon began to pass under the scab, which after a while fell off.

My skin is now clear, and I know by my feelings that the disease has gone from my system.

You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the apostles of the age, and remain ever gratefully yours,

ALFRED B. TALLEY.

St. Anthony's Fire, Rose or Erysipelas, Tetter and Sore, Rheumatic Head, Ringworm, Sore Eyes, Dropsey.

Dr. Robert M. Preble writes from Salem, N. Y., 12th Sept., 1859, that he has cured an inveterate case of Dropsey, which threatened to terminate fatally, by the persevering use of our Sarsaparilla, and also a dangerous Malignant Erysipelas by largely exceeding the dose of our common Dropsey.

Dr. J. C. AYER: Sir, I am told that you have a

Brachiocephalic, Goitre or Swelled Neck.

Zebulon Sloan, of Prospect, Texas, writes: "Three bottles of your Sarsaparilla cured me from a Goitre—a hideous swelling on the neck, which I had suffered from over two years."

Leucorrhœa or Whites, Ovarian Tumor, Uterine Ulceration, Female Diseases.

Dr. J. B. S. Channing, of New York City, writes: "I most cheerfully comply with the request of your agent in saying that your Sarsaparilla is a most valuable alterative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scrofulous diathesis. I have cured many inveterate cases of Leucorrhœa by it, and some where the complaint was caused by ulceration of the uterus. The ulceration itself was soon cured. Nothing within my knowledge equals it for these female derangements."

Edward S. May, of Newbury, Mass., writes: "A dangerous ovarian tumor on one of the females in my family, which had defied all the remedies we could employ, has at length been completely cured by your Extract of Sarsaparilla. Our physician thought nothing but extirpation could afford relief, but he advised the trial of your Sarsaparilla as the last resort before cutting, and it proved effectual.

After taking you remedy, only eight weeks no symptom of the disease remained.

Fraternally yours, G. Y. LARIMER, M. D.

Rheumatism, Gout, Liver Complaint.

INDEPENDENCE, Preston Co., Va., 6th July, 1859.

Dr. J. C. AYER: Sir, I have been afflicted with a painful chronic Rheumatism for a long time, which baffled the skill of physicians, and stuck to me in spite of every remedy. I was told to take your Sarsaparilla. One bottle cured me in two weeks, and restored my general health so much that I am far better than before I was attacked. I think it a wonderful medicine.

J. FREEMAN.

YANKEE, of St. Louis, writes: "I have been afflicted for years with an affection of the Liver, which destroyed my health. I tried every thing, and everything failed to relieve me; and I have now a broken heart, and for the last two years have been a burden to my friends, from the derangement of the Liver. My beloved pastor, the Rev. Mr. Eddy, advised me to try your Sarsaparilla, because he said knew you, and anything you made was worth trying. By the blessing of God it has cured me, and has so purified my blood as to make a new man of me. I feel young again. The last that can be said of you is not half good enough."

Schistos, Cancer Tumors, Enlargement, Ulceration, Curies and Exfoliation of the Bones.

A great variety of cases have been reported to us where cures of these formidable complaints have resulted from the use of this remedy, but our space here will not admit them. Some of them may be found in our American Almanac, which the agents below named are pleased to furnish gratis to all who call for them.

Dyspepsia, Heart Disease, Fits, Epilepsy, Melancholy, Neuralgia.

Many remarkable cures of these afflictions have been made by the alterative power of this medicine. It stimulates the vital functions into vigorous action, and thus overcomes disorders which would be supposed beyond its reach. Such a remedy has long been required by the necessities of the people, and we are confident that this will do for them all that medicine can do.
